

Press Release

For Immediate Release

January, 2018

SAFE-FLUSH®

New for 2018; HECAT's Premium A/C Flushing Fluid (**SAFE-FLUSH® A/C**) and Transmission Oil Cooler Flushing Fluid (**SAFE-FLUSH® Trans**), will now be just known as **SAFE-FLUSH®**. In addition to the traditional 4 gallon case packaging; a 2 gallon case, and single gallons will now also be available.

"Continuous improvements led to both products using the exact same formula; so it just made sense to consolidate to the one trademarked brand name and to offer more convenient packaging variations." said Karl Matis, President of HECAT, Inc.

SAFE-FLUSH® is a synthetic hydrocarbon blended degreasing fluid; specifically formulated to target and dissolve both petroleum & synthetic lubricant residues; something that typical single component solvents often cannot do.

The product is compatible with common system materials, emits a friendly citrus odor, not DOT regulated, and is a CARB compliant low VOC consumer product. The low odor, low toxicity, & low flammability characteristics meet the need for an environmental, health & safety (EHS) compliant option for internal heat exchanger flushing as well as many other precision cleaning, parts cleaning, and degreasing projects.

HECAT, Inc. is a manufacturer of specialty internal heat exchanger flushing and cleaning equipment, tools, adapters, chemicals, and procedures for automotive, aviation, fleet, and industrial services. HECAT® PULSATOR® products are designed to be an integral part of any proper air conditioning, automatic transmission, engine cooling, and system decontamination, reconditioning, and repair process.
